Personal Profile

I am a hardworking and dedicated professional seeking a challenging role that allows me to develop new skills while applying my existing knowledge. I work well both independently and as part of a team, and bring valuable experience that would make me a strong asset to any organization.

Recently completing a Full-Stack Development course, I have built a strong foundation in web technologies including HTML, CSS, JavaScript, jQuery, PHP, Python, C#, and MySQL. I have applied these skills to real-world projects such as an interactive map application and a company directory system. I am motivated to continue growing as a developer and contribute to the success of an organization through my technical expertise and dedication.

Work Experience

Branch Manager

Elite Garages - Strood

August 2025 to Present

- Oversee the branch's daily operations, ensuring all targets and budgets are consistently achieved.
- Handle daily customer interactions, providing accurate quotes and determine accurate pricing for tyre fitting, repairs, and other automotive services.
- Manage team workloads, and address any staffing or personnel issues effectively including coordination of staff schedules.
- Lead and manage branch-level projects, ensuring timely delivery, adherence to budgets, and compliance with company standards.
- Ensure full compliance with company policies, health and safety procedures, and industry regulations.
- Uphold exceptional customer service standards, promptly managing escalations and customer feedback.

Full-Stack Software Engineering (Certificate of higher education)

IT Career Switch

2024 to 2025

Relevant Projects

- **Gazetteer** - Project Gazetteer is a web-based app that lets users search and explore cities and countries on an interactive map. It displays real-time data such as weather, population, time zones, currency rates, and Wikipedia links using APIs like GeoNames, OpenWeather, and Open Exchange Rates.
- **Company Directory** - Company Directory is a responsive web app that allows users to manage and search company personnel, departments, and locations through a full CRUD interface. Built with HTML, CSS, JavaScript, jQuery, PHP, and MySQL, it is designed mobile-first but works seamlessly on desktop. The project showcases professional design, usability, and the ability to deliver a complete, real-world business solution.
- **JavaScript Affirmation Generator** - Created a dynamic web app that displays random positive affirmations using DOM manipulation and event listeners.
- **Responsive To-Do App** - Built a fully responsive to-do list application with local storage, styled with Flexbox and CSS Grid.
- **WorkAround Explorer** - Developed a web application using JavaScript and APIs to visualize salary data in tech, including sorting and filtering functions.
